PROJECTS

- **Farm-Mitra Farm Work Tracker** ([view](#)) (Jan'25-Jan'25)
 - A personalized farm work tracking web app built for my father to efficiently log and manage farming tasks done for different customers. The app supports secure login using Firebase Authentication and provides full CRUD functionality to add, edit, and delete daily work entries. Designed with a clean, mobile-friendly interface to simplify usage for non-technical users.
- **Reelify - Short Video Sharing Web App** ([view](#)) (April'25-june'25)
 - A mobile-first short video sharing web app inspired by YouTube Shorts, built using the MERN stack (MongoDB, Express, React, Node.js). Features include Google and email/password authentication, video uploading via Multer with local storage, animated like/follow interactions, real-time comments, and profile management. Designed with a smooth, modern UI using Tailwind CSS. Reels feed supports auto-play and swipe navigation. Fully responsive and optimized for user engagement. Future-ready for cloud storage integration.
- **portfolio website** ([view](#)) (April'25-may'25)
 - A fully responsive personal portfolio website built using Next.js and Tailwind CSS to showcase my projects, skills, and experience. Designed with a clean, modern UI for smooth navigation and optimized for performance and SEO. Includes links to live projects, GitHub, resume download, and a contact form. Deployed via Vercel with a custom domain for professional branding.
